🎓 EDUCATION

Bachelor in Software Engineering
Canadian Institute of Technology ⬈
10/2023 – present | Tirana, Albania
The Bachelor of Software Engineering program at the Canadian Institute of Technology provides thorough training in modern technologies and methodologies, emphasizing Python programming, data structures, and computer networks. Through hands-on projects and simulations, students develop practical skills and critical thinking, preparing them for dynamic roles in the tech industry.

📚 COURSES

Computer Communication and Network
CCNA

Data Structures and Algorithm
Developer's Library

C# Basics for Beginners: Learn C# Fundamentals by Coding
Udemy

🧠 SKILLS

Data Structures and Algorithm

Python
Basic proficiency in Python

Computer Network
Understanding of basic network protocols and technical computer networks.

PC Device Management
Proficient in setting up and troubleshooting PC hardware and peripherals.

Web Development
Understanding of websites and web hosting fundamentals.

Java
Basic Knowledge of Java language

SQL
Basic knowledge of SQL

Git and Github
Skilled in Git for version control and GitHub for collaborative development.

Javascript
Basic knowledge in Javascript
